

Snowflake Based on a Five-point Star

1. Place a square of paper pretty side down. Fold the bottom point up to the top to form a triangle.

2. Bring the left corner over to the right corner and mark the midpoint by pressing a small crease into the paper. Open the triangle.

3. Bring the right corner up to the top and mark the midpoint by pressing a small crease into the paper. Open the triangle again.

4. Bring the top corner down to the crease you just made and mark the midpoint by pressing a small crease into the paper. Open the triangle again.

The paper should now have three points marked with creases.

5. Fold the right corner upward so the bottom edge of the triangle meets the upper crease.

6. Fold the left corner upward so the bottom edge of the triangle aligns with the opposite side.

7. Fold the resulting shape in half so the right edge aligns with the opposite side.

8. Cut your design.
